SUMMARY

Healthcare training and workforce-performance leader who supervises educators and develops onboarding, coaching, and practical support tools. Uses audits and KPI data to identify training needs and measure staff improvement. Brings 10+ years in regulated healthcare and hands-on experience training Cerner EHR users and supporting workflow adoption.

EXPERIENCE

Operations and Compliance Lead | Training & Staff Development

Texas Health and Human Services Commission | Austin, TX | Dec 2019–Present

Lead staff development and clinical workflow training for interdisciplinary healthcare teams supporting psychiatry, psychology, nursing, and therapy services.

- Directly supervise department staff, including educators; provide functional oversight of training, onboarding, coaching, and performance across professional staff.
- Review audits and KPI trends across 17 teams to identify training and workflow gaps; targeted training and coaching helped raise progress-report quality scores from about 60% to 80–90%.
- Built Cerner PowerChart/Iris training materials and adoption tracking for 140+ staff across 10 departments; 95% completed training within two months.
- Rebuilt onboarding around shadowing, guided practice, and audit feedback, reducing the training period from about one month to one week.
- As a certified Cerner super user and master trainer, worked with technical staff and users on forms; 80% of documentation moved to structured digital workflows.
- Built Excel trackers, replaced manual training signatures with Microsoft Forms, and organized training records and shared guidance in SharePoint/OneDrive.
- Led a person-centered planning rollout that trained 400+ staff in one month; built templates, audit tools, and continuing training to support correct use.
- Built KPI dashboards and follow-up routines across 17 teams to monitor staff performance; these changes contributed to a 43% increase in goals meeting success measures.

Program Compliance Coordinator

Texas Health and Human Services Commission | Austin, TX | Mar–Dec 2019

- Reviewed audit findings and recurring staff errors at two healthcare sites, then coordinated corrective training and follow-up with site leaders.
- Coordinated retraining when repeat findings threatened program funding; 100% of affected staff were retrained and repeat deficiencies were eliminated.
- Built Excel action trackers so site leaders could monitor completion and check whether corrective changes were working.

Unit Supervisor

Texas Health and Human Services Commission | Austin, TX | Aug 2017–Mar 2019

- Supervised unit staff, set performance expectations, and addressed gaps in daily assignments, service requirements, and coverage.
- Analyzed recurring staffing gaps and helped implement a cross-unit coverage model that improved staffing efficiency by 25%.

Team Coordinator

Texas Health and Human Services Commission | Austin, TX | Mar 2016–Aug 2017

- Translated interdisciplinary service plans into staff instructions, coordinated required training, and reviewed progress data to update guidance.
- Selected as an early Cerner Iris super user; trained staff, answered system questions, and supported the move to electronic documentation.

Psychological Assistant

Texas Health and Human Services Commission | Austin, TX | Sep 2015–Mar 2016

- Collected behavioral data, tracked progress, and maintained records for behavioral-service teams under licensed psychologist supervision.
