HEALTHCARE OPERATIONS MANAGEMENT | CLINICAL PERFORMANCE IMPROVEMENT

PROFESSIONAL SUMMARY

Healthcare operations leader with 10+ years of experience supervising interdisciplinary teams, coordinating clinical workflow improvements, and using KPI and audit data to improve quality and staff effectiveness. Supported healthcare technology adoption for 140+ employees across 10 departments, improved operational reporting across 17 teams, and independently advises external companies on Medicaid-related operational processes.

CORE CAPABILITIES

Clinical Operations Improvement • Cross-Functional Project Coordination • Workflow Assessment & Redesign • Performance Metrics • KPI Dashboards & Reporting • Stakeholder Collaboration • Change Adoption • Process Standardization • Compliance Corrective Actions • Workforce Efficiency • SQL • Python • Advanced Excel • Cerner EHR

PROFESSIONAL EXPERIENCE

Operations and Compliance Lead | Training & Staff Development | Texas Health and Human Services Commission | *Dec 2019 – Present*

- Lead clinical workflow improvement and staff performance initiatives across psychiatry, psychology, nursing, therapy, technology, and administrative teams; supervise department staff, including educators.
- Build KPI dashboards and action follow-up routines across 17 teams to identify performance gaps, monitor corrective efforts, and inform operational decisions; improvements contributed to a 43% increase in goals meeting success measures.
- Use SQL, Python, and advanced Excel in healthcare operations for data extraction, cleaning, trend analysis, and recurring performance reporting.
- Collaborate with technical teams and clinical users to standardize Cerner PowerChart/Iris forms and documentation workflows, supporting conversion of 80% of documentation to structured digital processes.
- Coordinate clinical EHR workflow adoption across 10 departments and 140+ staff; develop rollout guidance and track implementation milestones, achieving 95% training completion within two months.
- Redesign onboarding workflows around guided practice, structured shadowing, and audit feedback, reducing training time from approximately one month to one week.
- Use audit findings and KPI trends to identify root causes of quality gaps and coordinate targeted process guidance and coaching; progress-report quality rose from approximately 60% to 80–90%.
- Lead cross-department implementation of person-centered planning practices for 400+ staff within one month; create standardized templates, monitoring tools, and reinforcement resources.
- Replace manual signature workflows with Microsoft Forms, develop Excel trackers, and centralize operational guidance through SharePoint/OneDrive.

Independent Medicaid Operations Consultant (Intermittent, Project-Based) | Self-Employed | 2026 – Present

Provide occasional independent consulting to external companies on Medicaid-related healthcare operational processes and service workflows.

Discuss existing processes with client stakeholders and advise on practical workflow improvement opportunities in regulated healthcare services.

Program Compliance Coordinator | Texas Health and Human Services Commission | *Mar – Dec 2019*

- Assess audit trends and recurring operational deficiencies at two healthcare sites; coordinate corrective action with site leaders, establish action trackers, and review resolution progress.
- Organize targeted retraining and follow-up when repeat compliance findings threatened funding; achieve 100% retraining of affected staff and eliminate repeat deficiencies.

Unit Supervisor | Texas Health and Human Services Commission | *Aug 2017 – Mar 2019*

- Supervise healthcare unit operations, staffing coverage, service delivery, and performance expectations, escalating and resolving recurring operational gaps.
- Analyze recurring staffing and coverage constraints and help implement a cross-unit coverage model, improving staffing efficiency by 25%.

Team Coordinator | Texas Health and Human Services Commission | *Mar 2016 – Aug 2017*

- Translate interdisciplinary service plans into practical team guidance, coordinate execution, and use progress data to improve workflows.
- Serve as an early Cerner Iris super user, supporting staff adoption and transition from paper to electronic documentation.

Psychological Assistant | Texas Health and Human Services Commission | *Sep 2015 – Mar 2016*

- Collect behavioral data, monitor progress, and maintain records for behavioral-services teams under licensed psychologist supervision.

TECHNICAL SKILLS
